Smart + Healthy Living

Healthy Living made possible by air filtration and ventilation system

Clean air supply and foul air removal made easy

- Modern and fashionable in appearance, avant-garde

- 2.5 pure physical filtration, PM2.5 purification efficiency of 99.5%, a unique sterilization filter layer, the effective removal of odor and chemical gas pollution

- Two-way flow design, internal and external circulation function, always maintain oxygen-enriched environment

- Intelligent APP control, large data optimisation, remote operation, monitoring of home air quality

- Pipeless, wall mount instalation, convenient and beautiful, suitable for small room use.

- Silent design: DC brushless silent fan

- Full heat exchange core, constant temperature and humidity, energy saving, save money, more peace of mind

- Intelligent display filter shelf life, automatic prompt replacement easy to replace filter

- With power protection, throttle close function, national 3C safety certification

- Auxiliary heat design: to improve inner wind temperature, effective against winter and extreme weather

Machine Dimension (WxDxH)	380x175x800mm
Power	60W
Coverage Area	<30 m²
Fresh Air Volume (Outer Loop)	120m³/h
Particulate Matter CADR Value	260m³/h
Noise (Sound Pressure Level)	<50dB(A)
Control Method	4.3" TFT Touchscreen + Smart APP + Wechat Data Sharing
Auxiliary Heat Power	100W
Filtering System	G4 Early Effect/ Antibacterial Filter/ F7 Medium Effect/ Activated Carbon/ High Efficiency HEPA
Sensor Configuration	PM2.5 / C02 / Temperature
Airflow	Two Way Flow, Internal and External mechanical Exhaust
Heat Exchange	Full Heat Exchange
